PROFILE

Passionate IT fresher with skills in programming, web development, and networking. Experienced in using modern AI tools like ChatGPT, Copilot, Bolt.AI, and others to boost productivity and streamline development. Interested in website design, committed to continuous learning, creative problem-solving, and delivering value through teamwork and technology.

PROJECTS

HR MANAGEMENT

- Developed HR Management System using SQL and JDBC.
- Implemented two user roles: Employee and HR.
- Enabled employees to view personal data, apply for leave, and check leave approval status.
- Provided HR with functionalities to approve/reject leave requests.
- Integrated salary management for salary deductions based on leave records.
- Built HR tools for adding, modifying, and deleting employee records.

E-COMMERCE WEBSITE

- Created a modern, mobile-responsive UI for a clothing e-commerce site.
- Implemented intuitive navigation, product filters, and clear categorization.
- Integrated high-quality images and a seamless checkout process for better user experience.

<https://github.com/khushi-verma07/E-Commerce>

FOOD-ZONE WEBSITE

- Developed a full-stack food delivery application using the MERN stack.
- Implemented dual user roles:
- User – Browse menu, place orders, and make secure payments via integrated payment gateway.
- Admin – Manage food items (add/remove) and oversee customer orders.
- Utilized MongoDB for efficient and scalable data storage.

STUDY MATERIAL SHARING WEBSITE

- Developed EduLinker, an online platform connecting students with educational resources and opportunities.
- Built with MERN stack and MongoDB for scalable, full-stack development.
- Integrated Razorpay payment gateway for secure transactions.
- Added AI-powered recommendations to suggest personalized learning resources.
- Designed a user-friendly interface with advanced search and filtering for easy navigation.
